

# SUJAN TONDWALKAR

Graphic Designer | Photographer | Artist | Visualizer

## About Me

I am a passionate and creative professional with a strong interest in exploring the dynamic fields of art, photography, and graphic design. With a solid foundation in these disciplines, I continue to grow through ongoing learning, experimentation, and self-expression.

In my artistic pursuits, I work with a variety of mediums including poster colours, watercolors, and digital tools. Inspired by nature, human emotion, and everyday moments, I aim to create work that is both authentic and expressive, bringing depth and personal meaning to each piece.

My passion for storytelling through visuals has led me to immerse myself in photography. I am continuously refining my skills in composition, lighting, and post-processing while exploring diverse genres such as landscape, portrait, street, fashion, wildlife, astrophotography, and product photography.

In graphic design, I am driven by the power of visual storytelling and effective communication. I focus on mastering the principles of design, including typography, color theory, and layout, while becoming proficient with industry-standard software to deliver impactful and aesthetically engaging work.
